

PHYSICAL CONNECTION TEST

SUREN NETWORK
PLAY WITH TECHNOLOGIES

1, Types of mediums ?

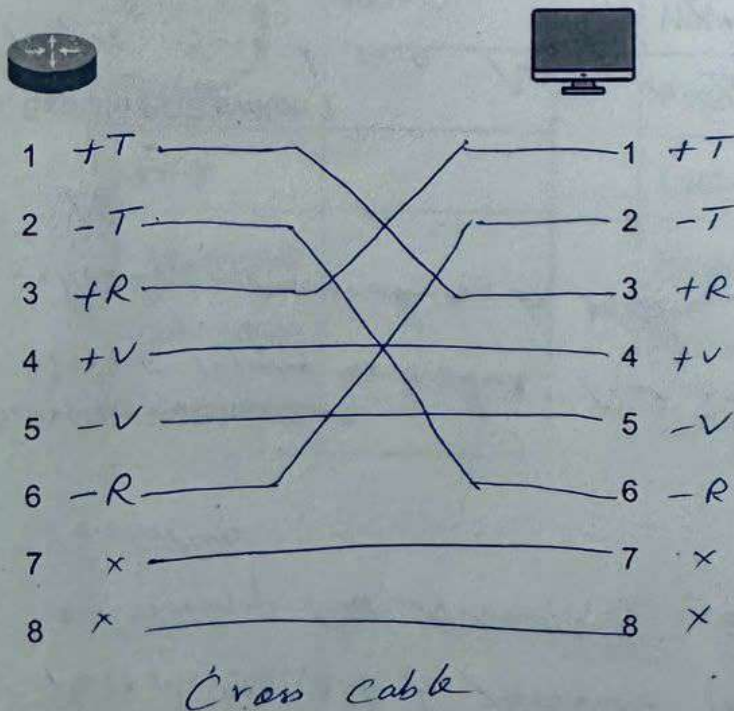

We have '3' Types of mediums:

1. Radio Frequency → Wireless
2. Electrical Frequency → Copper wire
3. Light Signal → Fiber optic

2, Write down switch 8-pins ?

- | | | |
|------|-----------------------------------|--|
| 1 +R | } Receiver | |
| 2 -R | | |
| 3 +T | } voltage { Transmitter (Sending) | |
| 4 +V | | |
| 5 -V | | |
| 6 -T | | |
| 7 x | | |
| 8 x | | |

3, Connect utp cable between two devices

4, Explain AUTO MDIX ?

AUTO MDIX Stands For Automatic Medium-Dependent Interface Crossover, a Technology That Automatically Detects & Adjusts Ethernet Port Connections.

5, Explain POE injector ?

A POE injector is a device That adds electrical power to an Ethernet Cable allowing network devices to receive both data and Power over a Single Cable.

6, Explain POE switch ?

A POE Switch is a Network Switch and delivers both data & Electrical Power over a Single Ethernet Cable to Connected devices.

7, Explain types of nic & function ?

We have '2' Types of NIC - Network Interface Card. It Contains "MAC + IP"

1. Wired NICs

└ UTP (eg: LAN Cable, Cat 5, 6 etc)
└ Fiber (eg: Fiber optic Cable)

2. Wireless NICs - (eg: Radio Frequency Signals).

Functions of NICs:-

It is use to Convert binary Signals to Electrical & Electrical to Binary Signal.
